Adapeter SC/APC SM flangeless

The adapter is designed for connecting SC-type optical connectors with angular spherical (APC) polishing of single-mode (SM) fiber.

The body frame made of green plastic. The tips of optical connectors are joined using a precision centering sleeve made of zirconium ceramics. The connectors are secured with hidden latches. On the connecting parts of the adapter housing there are recesses for the key plugs of the connectors. The socket is attached to the adapter bar using a metal stopper. In this version, the socket body does not have flanges with holes for additional fixing of the socket with screws. Adapters are equipped with plastic plugs to protect them from dust before installing connectors

Technical characteristics

Manufacturer	
Body material	Plastic
Centering sleeve material	Ceramics
Storage temperature, °C	-40 ... +80
Operation temperature, °C	-20 ... +70
Dimensions, mm	15x9,4x27,4
Weight, g	4,8

Complete set

Adapter, pc	1
Protective plug, pc	2
