Splicing chamber

Designed for the construction of electrical and telecommunication cable networks as a viewing device for cable ducts, to protect closures and technological reserve on cable from external influences (including rodents) at the joints of the working lengths of the cable laid in PE pipes.

Technical characteristics

Manufacturer	
Type of material	Medium Density Polyethylene
Number of sites for pipe entry, pcs.	4
Length, mm	875
Width, mm	745
Height, mm	427
Operating temperature, C °	-40...+60
Weight, kg	14

Basic scope of supply

Body frame	1 pc.
Cover	1 pc.
Volume, m3	0,280580
Weight, kg.	15,55
