Optical closure MOG-U

The inline closure MOG-U is designed for all types of cables for urban applications. It can be installed in manholes and in cable conduits. The MOG-U closure can be placed where the distance between consoles is less than 700 mm.

Endpieces are sealed in the housing using heat shrink tubing. Reopening and resealing is made using heat shrinkable sleeves.

Technical characteristics

Manufacturer	
Max. number of splices	144
Number of entered FOC	from 2 up to 4
Max. number of trays	3
Sealing method of case	Clamp
Sealing method of entered FOC	Heat shrinkable tube
Operating temperature, °C	- 60...+70
