Subscriber optical socket

The cross socket (SHKON-PA-1) is designed for installation in offices and residential premises. The optical cable is laid and fixed on the base. The fiber is welded to the pigtail; splice protection kit is fixed in the stand. Fibrlok mechanical connectors can be used. The adapter is installed in one of the places on the base of the body frame.

Technical characteristics

Manufacturer	
Body material	Non-flammable ABS plastic
Max. number of input optical cables	1
Max.diameter of the optical cable, mm	3
Max. number of ports SC(LC)	1
Dimensions, mm	95x90x15
Weight, kg	0,07

Basic scope of supply

Body frame with a cover	1 piece
Socket (adapter)	1 piece
Mounting kit	1 kit
