Rack-mounted optical splice box SHKOS-L 1U

The SHKOS-L series cross optical rack is designed for installation in 19", 21", 23" racks. The cable is fastened to the sheath with a metal clamp and / or nylon ties, on a T-shaped petal. The central power element of optical cable is attached with a metal bracket. Interchangeable metal strips with 8 or 4 holes allow the installation of various types of socket adapters: FC, SC, ST, duplex LC.

Features:

- replaceable plastic strips;
- the ability to change the position of the mounting brackets to adjust the depth of the cross in the rack;
- reliable fixation of the outer sheath of the cable with metal screw clamps;
- the possibility of cable entry from all directions, thanks to the longitudinally located cable entry.

Characteristics

| | |
|-------------------------------------|---|
| Manufacturer |  СВЯЗЬСТРОИТЕЛИ |
| Number of line optical ports | 24/48 |
| Max. number of input optical cables | 2 |
| Type of telecommunications rack | 19", 23", ETSI |
| Dimensions, mm | 410x210x41,5 |
| Weight, kg | 2,7 |
