Rack-mounted optical splice box SHKOS-S 1U

Designed for termination, distribution and switching of optical fibers, it is installed in racks or telecommunication cabinets of 19" size, and before completing with additional brackets in racks and cabinets of standard sizes 21" (ETSI) and 23". The cable is mounted to the sheath with a metal clamp and / or nylon ties, on a specialized cable gland, which is attached to the rear wall of the case. The central power element of optical cable is attached with a metal bracket. Interchangeable metal strips with 8 or 4 holes allow the installation of various types of socket adapters: FC, SC, ST, duplex LC. It is completed with removable front organizer shelf.

Technical characteristics

Manufacturer	
Number of line optical ports	24/48
Max. number of input optical cables	4 or 2 overflying
Type of telecommunications rack	19", 23", ETSI
Dimensions, mm	410x210x41,5
Weight, kg	2,9
