### T-type clamp for drop cable

Designed for aerial installation of flatform cable on supports of overhead network lines, railway network, power lines, between buildings and constructions. It consists of an open housing with a ribbed contact surface, a wedge with an attached wire loop and a perforated insert like a "float" that is laid between the cable and the wedge. The clamp design provides a rigid mount of the cable. Consists on the body frame, wedge, stainless steel insert, chrome steel bail. It is recommended to be used for all sections of the cable route practically in any angles of its turns.

#### Technical characteristics

Manufacturer	
Material	Stainless steel
Max. Cable dimensions, mm	5x13
Working load limit, kH	1,5
Dimensions, mm	220x20x13
Weight, g	40
Equipment Clamp, piece	1
